#### DETAILED ACTION

### Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. The claimed invention is directed at "a system for performing a switch auction utilizing financial instruments portfolios..". However, the claims is silent about any limitation or means which performs this stated objective.

  As per claim 1, there is no element of the system which performs a "switch auction".
- 4. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: limitation(s) that would relate "means for matching offsetting risk positions" to "means for determining an auction price" and "means for calculating relative risk positions". (emphasis added to highlight the discrepancy).

Art Unit: 3624

Furthermore, limitation "means for offsetting risk positions" does not relate to the financial portfolios received at the "means for receiving financial instrument portfolios inputted by ..traders".

These deficiencies render claim 1 and dependent claims 2-7 indefinite because the scope of the claims cannot be ascertained clearly and definitely.

5. Claims have been analyzed as best understood in light of the aforementioned deficiencies.

## Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 1 and 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Donner et al. (EP 0 512 702 A2) (Donner) and further in view of Lupien et al. (US Pat. 5,101, 353) (Lupien).

preferences of a fist and second traders (see p. 2 L 49+ and continuing on p. 3 L 8.

Donner fails to teach means for calculating relative risk positions for the first and second trades based on received financial instrument portfolios received from the first and second trades.

Lupien in the same field of endeavor, teaches a system for matching financial instruments portfolios. Lupien discloses means for calculating risk positions for the first and second trades based on received financial instrument portfolios received from the first and second trades. ((abstract, The system analyzes a variety of factors which affect trading decisions..Col. 3 L 3+ the system contains portfolio balancing controls which seek to ensure that the risk and return characteristics of each portfolio are retained throughout..).

It would have been obvious to combine Lupien with of Donner so the risk positions are calculated for the first and second trades based on received financial instrument portfolios received from the first and second trades and subsequently match offsetting risk positions of the first and second traders based upon their respective credit preferences, because the combined system would permit

Art Unit: 3624

matching risk positions based on credit preferences of the traders ensuring that the trades executed by the system would be in accordance with the risk tolerance of each participating trader.

8. Claims 3-7: All other claim limitations are disclosed by Donner. (see p. 2 L 49+ and Figures 2A, 3B, and 4A).
